

INDIAN HEAD HATCHERY

Expansion Project

What new components does the Project include?

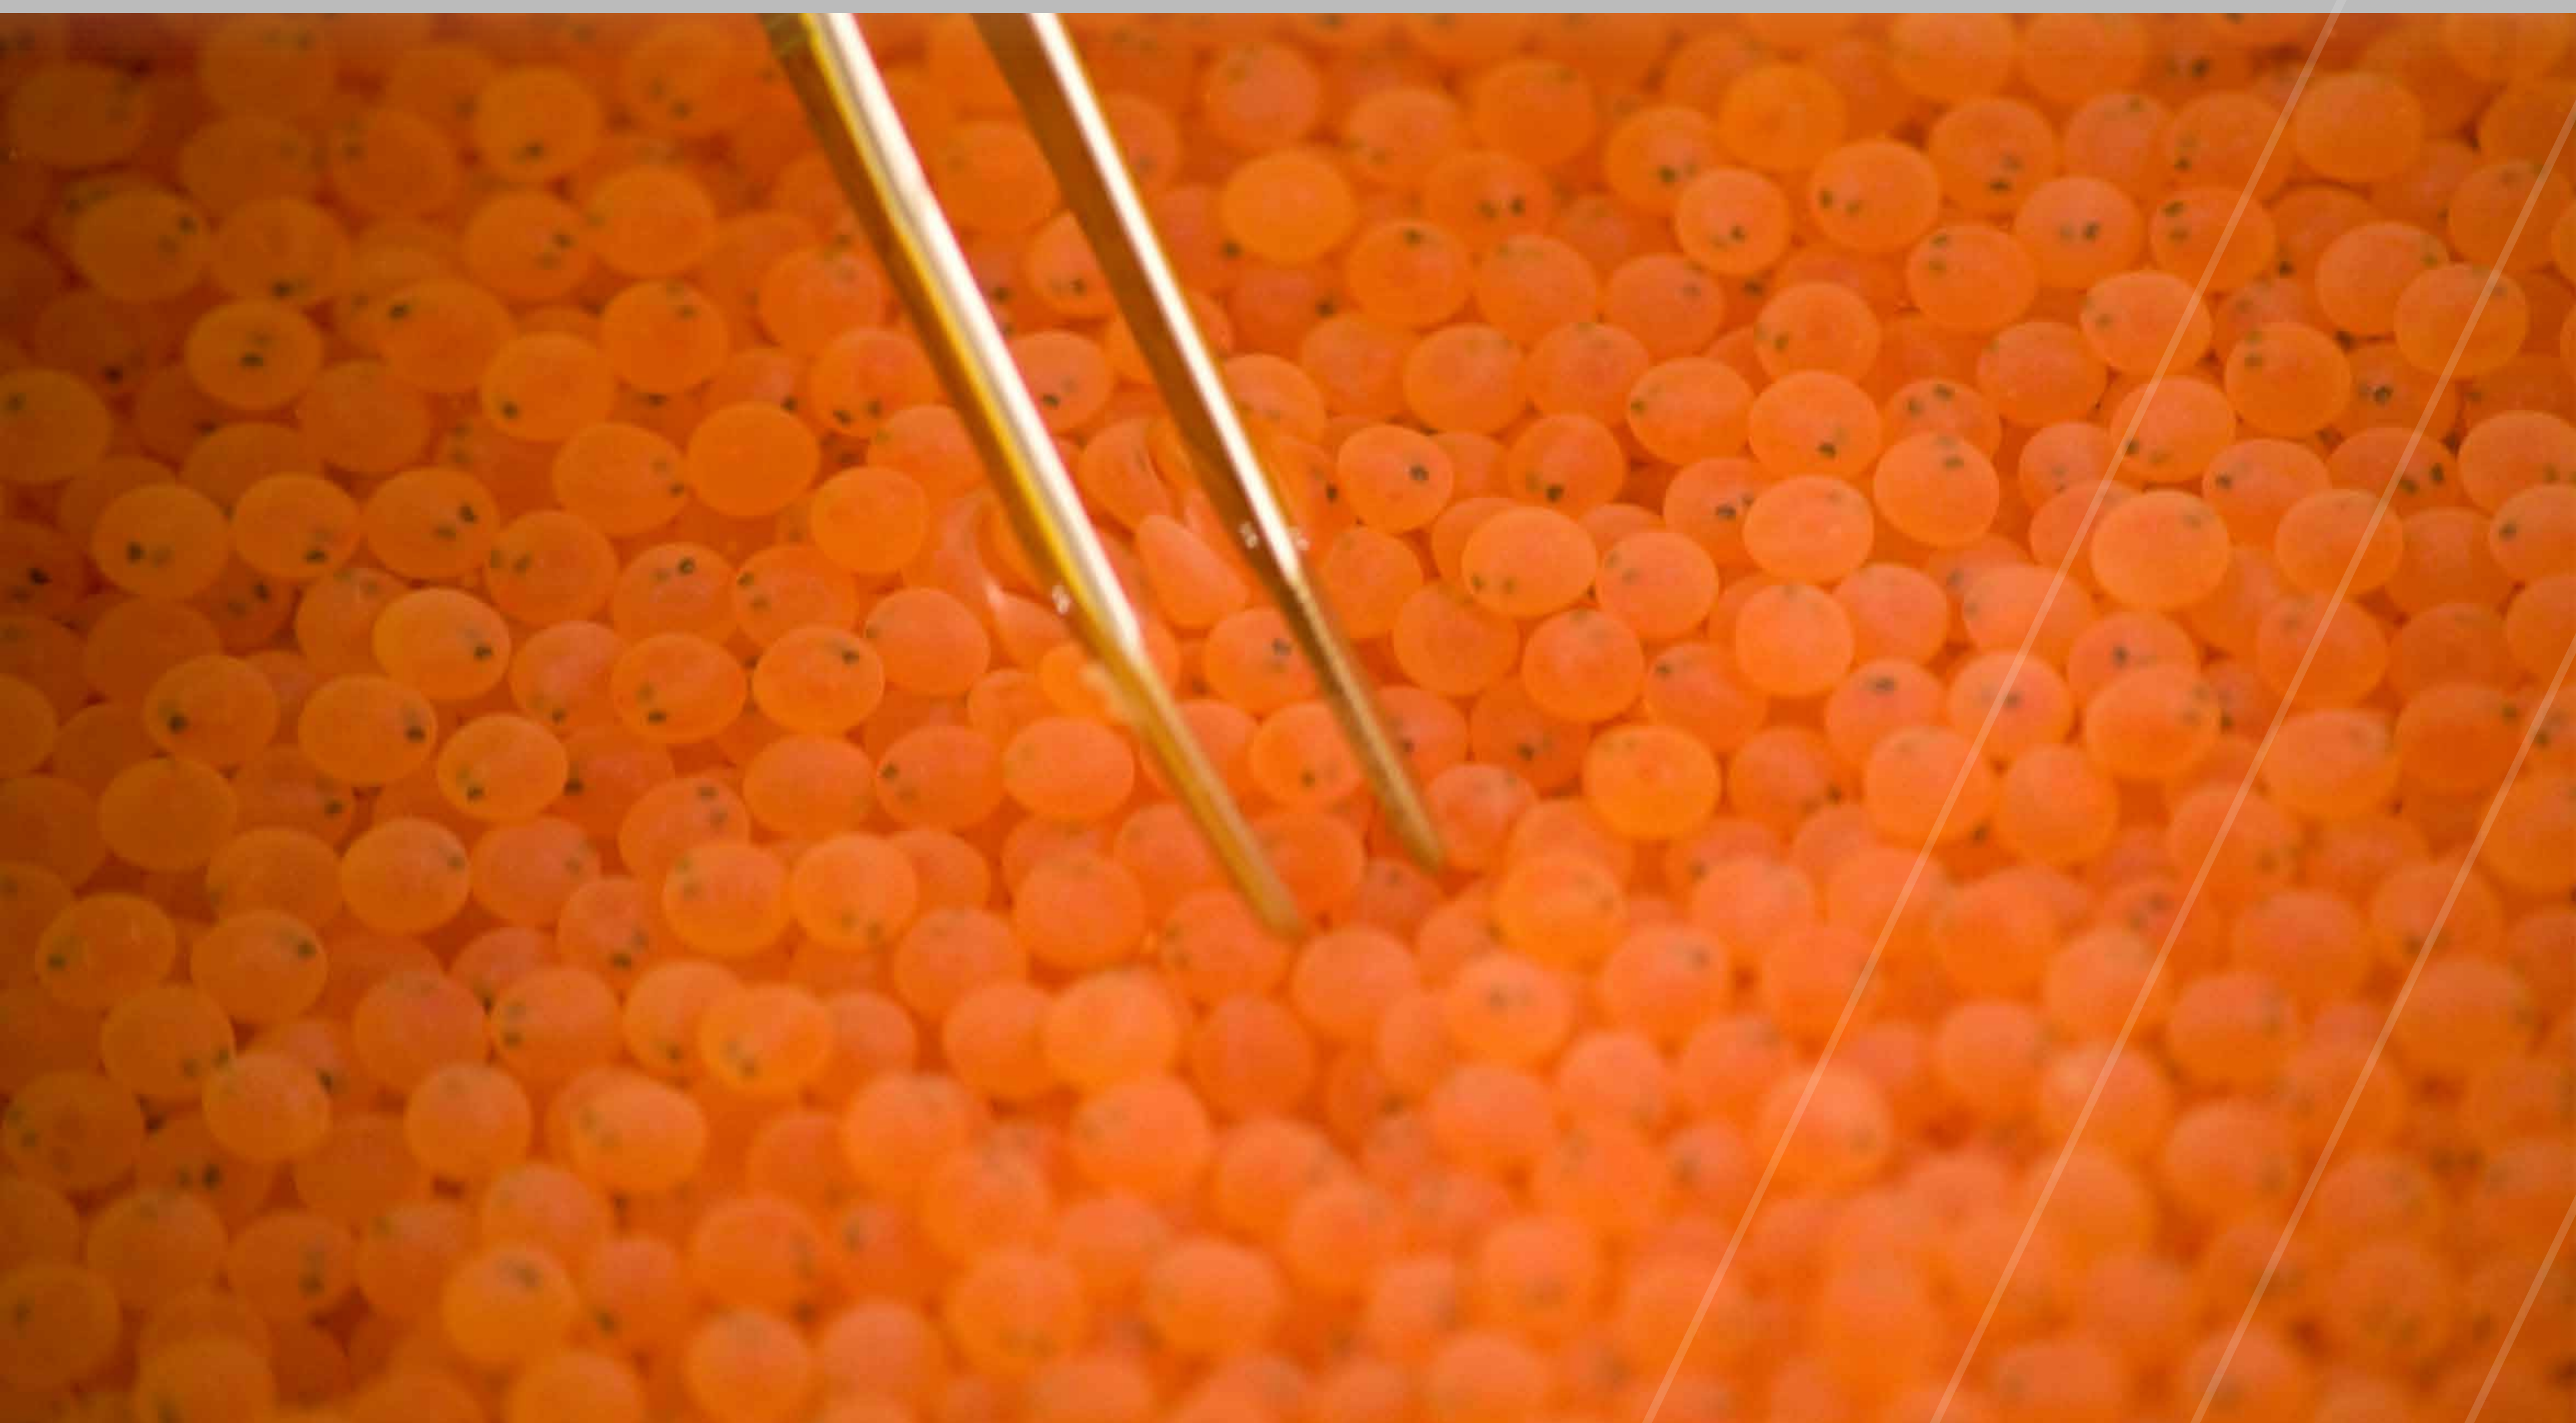

- Advanced modular RAS smolt production facility
- Improved wastewater treatment building and deep-water outfall
- Additional wells (freshwater, saline) and water treatment building
- Upgraded fully-enclosed fish transfer system
- Enhanced egg incubation system
- Modern fish vaccination/grading system
- Additional 2.2 million smolt production per year

For more information, we have prepared a video for you, featuring Mowi's Natasha Gill, to learn more about our freshwater systems work and this Project.
